

My First Page

1st **INDEPENDENT** web page

This will be your first project and you will need to read these instructions carefully. First, create a new folder called "**My First HTML Page Project**" everything associated with this assignment must be saved within this new folder. Your starting web page must have the file name, "INDEX.htm". The theme of this assignment is your choice: music, sports, etc. However, you must include all of the required tag commands and attributes I have listed. Now, you must decide on a theme or topic to focus on; design your page so that all the information is displayed in an aesthetically pleasing manner with easy to find links.

REQUIRED ITEMS for assignment:	Check-off	PONT VALUE:
