

HTML Image Rollover

Image will change when the mouse/cursor moves over the image

Instruction will be given in class. Also, the instructions and demonstration will be recorded and uploaded as a "screencast" on the website for review by students if necessary. Additionally, an example website is provided so the students know what is expected from them to receive full credit for the completion of the assignment.

Remember, these links will help you complete the assignment:

<http://mrkarmanos.com/style.txt>

<http://mrkarmanos.com/roll.txt>

First, you will create a new folder that will be titled, "**Image_Rollover**" inside your network folder and all work or items for this assignment will be saved in this new folder for grading. Remember the starting web page is always titled, **Index.htm**

You will be creating a single web page that have on it:

- 1) lowered opacity watermarked background image
- 2) 2 examples of an image rollover/swap
- 3) a common theme among chosen images

Requirements	Points
2 images downloaded and copies made in Grayscale	10
2 rollovers	20
Lowered opacity background	10
All work saved into a folder named, "Image_Rollover"	10
	Total 50
