

Instructions: Lesson 2

In Lesson 2 you will follow the same basic layout as Lesson 1: changing the background color of the page and adding your name and the assignment above a horizontal rule.

Now, for the new tags!! We will be affecting the display of text on a web page or formatting text. Text formatting can be done with the following tags:

```
<FONT FACE="Nimbus Roman No9 L" SIZE="1 -7" COLOR="navy"> text goes  
here </FONT>  
<P ALIGN="right"> </P>  
<CENTER> </CENTER>  
<SUP> </SUP>  
<SUB> </SUB>  
<U> </U>  
<STRIKE> </STRIKE>
```

Your assignment, after you have completed the basic layout, is to:

Display all 7 font sizes in 2 different faces and colors.

In addition, one set of 7 font sizes must be aligned to the right.

Separate each font size with a
 tag.

Then you will center text and affect it with the underline, sub, and sup tags.

**As always, save in your Network folder in a
NEW FOLDER NAMED "LESSON 2" and check to make sure it is there before you are done.
Remember, "SAVE AS" and manually add the .htm file extension, NO
SPACES in your Index.htm filename.**

Screenshots of example page and code are below

Good Luck!
