

## **Instructions: Lesson 3**

In Lesson 3 you will follow the same basic layout as Lesson 2; changing the background color of the page and adding your name and the assignment above a horizontal rule.

On this web page you will create 3 unordered `<UL> </UL>` nested lists within 3 `<OL> </OL>` ordered lists, each list must have at least 5 `<LI> </LI>` line items. You must use all of the unordered list types `<UL TYPE="square or disc or circle">`. Also, you will insert images into your web page. You will add the border, alt text, height, width, and src attributes to the new `<IMG SRC="files location" BORDER="some #" ALT="description of the image for the visually impaired surfer" WIDTH="some #" HEIGHT="some #">` tag for inserting images. The last image on your page must be located on a remote server, example `<IMG SRC="http://pub.tv2.no/multimedia/na/archive/00156/Lance_Armstrong_156706k.jpg">`

Moreover, you will need to align these image to the default or left, the right, and to the center `<P ALIGN="right"> </P>` and `<CENTER> </CENTER>`.

**As always, save in your Network folder in a NEW FOLDER NAMED "LESSON 3" and check to make sure it is there before you are done. Remember, "SAVE AS" and manually add the .htm file extension, NO SPACES in your Index.htm filename.**
