Html Extras–part 2

This assignment is designed to show you that there is more to creating a web page than just simple HTML; there are codes/scripts that can be added to simple HTML coded websites. You will be creating 3 new folders and 3 new web pages that these scripts will allow the scripts to function properly.

First, you will save all this work in your OneDrive folder titled, **'HTML EXTRAS'**. Then inside that folder (**HTML EXTRAS**), created 3 new folders and titled as follows, **'Image Trail Script' - 'Kissing Trail Script' - 'Custom Cursor Script'**. Remember to save all work and images inside theses folders.

Create a web page for each these scripts that will allow the scripts to function as they do on the example pages. You must **READ** and **FOLLOW** all the instructions if you are going to be successful, if you don't succeed on the 1st try do not give up, go back and try again. *"Always remember, the road to success is paved with bricks of failure."*

Requirement	Points
Image Trail Script	**20**
Kissing Trail Script	**20**
Custom Cursor Script	**20**
TOTAL	**60**
