

# Me Page

This project is worth 200 points. The theme of this website is you; your assignment is to build a personal web page (min. 3 web pages). However, you must remember to not use your last name or any other personal information about yourself that could be used to locate you or your family. Also, you must give credit for all borrowed information and or all media.

## The following must be completed before your assignment will be graded:

- A new network folder titled, "first name, first letter in your last name" i.e. DavidG -- inside your network folder.
- All web pages and all information contained in your website saved in the new folder stated above.
- The starting page for your site has the file name ' "INDEX" and contains your background information (50 or more of your own words).

## Your website must contain the following:

75pts. 3 web pages

Index – This is your starting point of your website and will contain your background information (50+words=25pts.).

P2 – This page will contain information about your interests and hobbies (50+words=25pts.).

P3 – This page will contain information about your plans after completing High School. (50+words=25pts.).

15pts. Proper use of all HTML and JAVA code commands and attributes. *No misplaced/used tags*

15pts. Consistent, esthetically pleasing color scheme. *Easy to read and Easy on the eyes*

15pts. All web pages hyperlinked together. *In a WEB layout - you can get to any page from any page*

20pts. 5 thumbnail images with TITLE="???" and/or ALT="???" attribute

10pts. Table with border attribute set greater than "0".

10pts. Table with border attribute set at "0".

15pts. Incorporation of a script from 'Dynamic Drive' (make sure to tell me where it is if it isn't easily identifiable)

10pts. Lowered opacity image set as a watermarked background. *Background image shouldn't move when the page scrolls*

15pts. Java image rollover. *Java code that causes a image to switch with another picture when the mouse moves over the image*
